DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1,3,4,6,7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Vallancourt (US 5,973,518).

Consider claims 1 and 7. Referring to Fig. 3, Vallancourt discloses “a filter system” comprising an input circuit (OA4), a sampling circuit (see capacitor and switched) and a feedback circuit. Regarding claims 4 and 9 additionally reciting a quantizer, see col.2, ll.19-26. The op amp (OA4) shown in Fig.4 reads on a summing

circuit, recited in claims 3 and 6, because it receives an input signal and a feedback signal and provides an amplified difference between the two signals.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 2,4,8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vallancourt (US 5,973,518).

Vallancourt disclose all the subject matter claimed but failed to specify the gain of the amplifier (OA4). However, it would have been obvious matter of design choice to vary the amplifier gain in the Vallancourt's apparatus to meet different performance requirements since applicant has not disclosed the claimed gain solves any stated problems or are for any particular purposes.
